AI: Artificial Intelligence

BASIC UNDERSTANDING

Artificial intelligence (AI) is the simulation of human intelligence processes (speech recognition, decision-making, visual perception) by machines

BASIC USE

Personal assistants: Siri, Alexa, Google Assistant

Smart homes: smart thermostats, security cameras

Social media: personalized content, ads

E-commerce: personalized product recommendations, chat bot support, video or music recommendations

Healthcare: medical imaging, symptom mapping, drug development, health records, develop treatment plans

Finance: fraud detection, stock analysis

Transportation: self driving cars, optimize traffic flow

Navigation: WAZE, Google maps

Education: personalized learning, auto grading

Communication: phrase prediction in email and text

Other: art, music, television, security, traveling, emergency services, production, agriculture...

BASIC TOOLS: MAGIC SCHOOL

- Designed specifically for educators
- Offers over 60 individual tools to support teachers in various aspects of their work, including lesson planning, resource creation, student assessment, and much more
- Utilizes “Raina,” a chatbot who serves as an “instructional coach” for Magic School Services

OPINION: A tremendous tool that all educators will be utilizing in some form very soon

BASIC TOOLS: CHAT GPT

- One of many large language models
- Generative Pre-Training Transformer
- Conversational AI Chatbot
- Programmed up to 2021 (\$)
- Uses language patterns
- May generate incorrect information
- May be biased or generate harmful instructions
- Users may be 13+

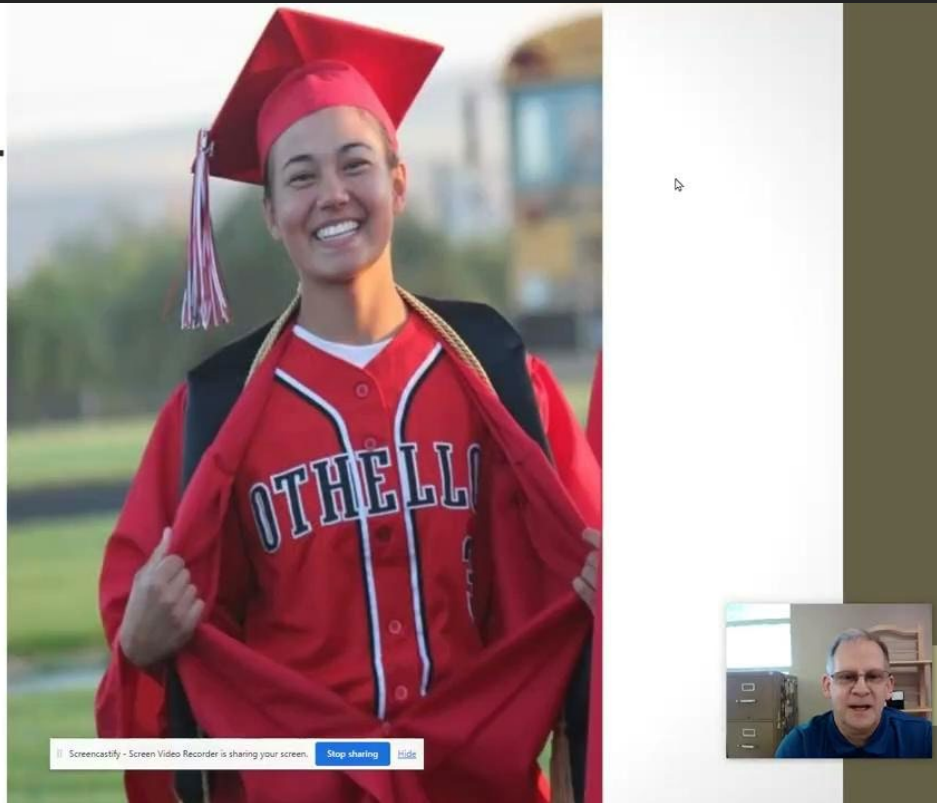

OPINION: This is a conversational search engine on steroids. Gives quick answers to questions, but some information may be incorrect.

OPINION: Begin using this today!

ADVANCED TOOLS: GOBLIN TOOLS

- Magic ToDo: standard to-do checklist that will breakdown steps to accomplish your list
- Judge: assesses the emotional content of a message through the eyes of a neutral party
- The Chef: Take the ingredients you have and the Chef will craft your meal!
- Formalizer: can rephrase emails sent in frustration into formal, classy emails. Type your unfiltered thoughts and let it go to work!
- Compiler: turn a braindump into a list of tasks
(A brain dump is a freewriting session where you unload anything on your mind onto a blank page. This may include anxieties, items on your to-do list, future planning, nagging decisions, work deadlines, and emotions. The idea is that by getting these running thoughts out of your head and onto the page, you will experience some freedom from the stress they often induce.)

OPINION: Begin using this today! Magic To-Do, Formalizer, and Judge can be used often.
